

## 1.8 Quality Management System Policy

As one of the UK's leading truck mounted road sweeper manufacturers, Stock Sweepers are committed to continued growth, the continual improvement of our Quality Management System and in satisfying all applicable requirements, including statutory and regulatory.

Stock Sweepers recognise that reductions in waste, and improvements in process understanding and compliance, will help to ensure the sustainability of our organisation; as will the maintenance of our organisational knowledge for the consistent provision of product and service, and for business continuity purposes.

Stock Sweepers are committed to achieving and maintaining accredited ISO9001 (2015) certification through co-operation, motivation, and effective collaboration with all interested parties. This will ensure consistency of approach, continual improvement and confidence in our processes to deliver products and services to requirements.

Quality objectives will be set to support this policy, and the organisation's changing context. These will be regularly reviewed during the scheduled Management review meetings.

Stock Sweepers are committed to enhancing customer satisfaction through the effective application of our Quality Management System, and with it a socially responsible attitude to the manufacture and installation of our products and services.

This Quality Management System has also been developed to meet the requirements of the Vehicle Certification Authority's Conformity of Production process.
